Allegheny County Probation Contractors
Facility: Mercy Behavioral Health  
Program: Alcohol Highway Safety Program  
Type: Allegheny County Probation Contractor  
Address: 1200 Reedsdale Street  
                         Pittsburgh, PA  15233  
Phone Number: 412-442-1974  
Fax Number: 412-442-1987  

The Mercy Behavioral Health DUI Program has been specializing in DUI education and treatment services for over 20 years. The classes are offered in a group setting. The classes are held in a relaxed, safe, and non-threatening environment. All of our instructors are certified to use the mandatory Alcohol Highway Safety School curriculum as required by law. Currently, we offer these separate programs:

- First time offender education classes, intervention groups and treatment groups.
- Multiple offender education classes, intervention groups, and treatment groups.
- Multiple offender electronic monitoring and treatment groups.
- Intermediate Punishment treatment groups
- Licensed Intensive Outpatient treatment

Our staff takes pride in its multi-faceted approach to the DUI problem. Some of the areas and issues we address are as follows:

- Environmental & Social influences
- Drug & Alcohol Education
- Physical Effects
- Economical Effects
- Family Effects
- Warning Signs
- Recovery & Support Services
- Prevention & Intervention

Our main focus is to address the need for positive behavioral changes concerning alcohol and other drug use. All services pertaining to consumer drug and alcohol issues are strictly confidential. If you would like further information, please contact us at the number listed below.

**Underage Drinking Program**
This program is designed for person under age 21 who have been charged with a drug and/or alcohol violation. This program is offered in conjunction with local magistrates as a possible alternative to fines, license suspension, and court costs. We offer formal assessments, if required by the magistrate, an 8-hour educational class using PennDOT’s approved underage drinking curriculum on the personal and legal effects of underage drinking. We encourage self-exploration and self-diagnosis in a safe and comfortable environment. Other topics covered in the class include:

- Peer Pressure
- Media Influence
- Confidence/Self-Esteem
- Physical Effects
- Social Effects
- Family Effects
- Warning Signs

Our goals for the program include:

- **Encouraging** responsible choices about the use of alcohol and other drugs.
- **Cultivating** the development of skills that enhance problem solving, stress management, and conflict resolution.
- **Promoting** the idea of healthy individuals and strong families.

Residential Programs
Alpha House is an inpatient, non-hospital, residential, rehabilitation agency, serving males and females, 18 years of age and over residing in Allegheny County and surrounding counties for the treatment of a drug and/or alcohol related problem.

Residents must meet the Pennsylvania Client Placement Criteria (PCPC), which determines eligibility for participating in this type of treatment. Admission also depends upon the client’s motivation and the nature and degree of his/her problems leading to substance abuse. Detoxification and/or some abstinence must have occurred prior to acceptance into the program. Persons participating in treatment at Alpha House must be motivated toward long-term residential treatment.

Through the use of peer pressure, individual counseling, groups, therapeutic work, and NA/AA meetings, within a therapeutic community, and auxiliary organizations, change is made possible. The environment is a medically managed, seven-day-a-week, 24-hour-a-day program. As residents learn to function within the therapeutic community, they learn practical alternatives to their individual problems and eventually return successfully to the societal community.

The length of stay at Alpha House is approximately six months, and followed, if indicated, by a lesser level of treatment. A course of treatment follows that is divided into four levels. The first level is approximately four weeks, which is a period of evaluation. The second level begins treatment, with an emphasis on changing the negative behaviors that had led to their abuse. The third level examines “feelings:” and learning how to respond to them more sensibly. The fourth level is the “respite” phase. Here, the resident has exhibited enough change to become eligible for greater responsibility of individual care. While still living at Alpha House the resident returns to the societal community by securing employment or furthering education. Upon completion of this phase, the resident leaves Alpha House to fully enter the societal community. Residents may elect to use Alpha House’s Outpatient program.

The major approaches to treatment are Reality Therapy, Transactional Analysis, Cognitive Reshaping, Rational Emotive Therapy, and Gestalt. Implementation of these models occurs
during the group process, Monday, Wednesday and Friday and individual therapy sessions by the Counselors and/or Outpatient Director.
Admission is determined by meeting the Pennsylvania Client Placement Criteria (PCPC), which determines eligibility for participating in outpatient treatment. An initial assessment is made within 24 hours, and an appointment will be made within seven days at the client’s convenience. We accept self-pays, medical behavioral health insurance as well as other funding.

The Outpatient program offers individual, group, and family counseling services to those clients who require a lower level of care; i.e., inpatient graduates and clients from outside the residential community. Therapy includes a cognitive behavioral treatment modality, along with the 12-step process. The outpatient department specializes in psychological assessment and evaluation, chemical dependency, adult children of alcoholics, co-dependency, dual-diagnosis, medical management, and counseling. A therapeutic team approach is used to assist the client with his/her problems. Utilizing the psychiatrist and counselors together, a plan is developed to help improve a client’s mental, emotional, and psychological health.

Outpatient services are private, confidential and wheelchair accessible.

The Intensive CRR 11 bed unit provides 24 hour supervised residential care to adults with a mental health disorder. The intent of the program is to assist and encourage each consumer to function independently through functional skills training, social skills training, medication management, community orientation and participation, psychosocial rehabilitation, symptom stabilization, and coordination of medical and day program needs. The goal is to provide, in a normalized community based setting, an opportunity for persons with disabilities to gain the skills necessary to transition into intermittent residential support or to live independently.

FSWP is utilizing the Boston University (BU) Model of Psychiatric Rehabilitation, to enhance the social skills teaching provided in Social Rehabilitation. The BU model is based on the “choose-get-keep” approach, focusing on role recovery, in this case facilitating the recovery of a social role. Its emphasis is on goal setting, and stresses client preference and availability. A rehabilitation goal is formed that includes what the consumer wishes to accomplish, including how much they’d like to participate, and how much interaction or involvement they’d also like to have in Social Rehabilitation.

Respite – Kim Olszewski  
**724-224-7586**  
The respite unit is four bed, 24 hour residential program designed to stabilize psychiatric crises and divert hospitalizations whenever possible. On an individual basis, the unit provides psychiatric assessment, medication management and monitoring, and service linking. Additionally, the respite unit's daily schedule includes individual and group sessions aimed at promoting coping skills, symptom stabilization, and preparing for post-discharge.
17 Group Homes Provide 24 hour supervised living for persons with mental retardation, or in-home supports to people living in their own homes. Training and support is provided to maximize independence in activities of daily living, participation in integrated community activities, and assistance with medical and psychiatric needs. Respite services provided to families caring for MR Adults in their homes. Respite services are dependent upon availability in the programs CLA’s.
Foster Care
412-661-1670
The Foster Care program was designed to include Emergency Shelter Care and Extended Foster Care, providing approved and supervised foster family care for children who are unable to live with their parent(s) or other birth family members. All children enter the Foster Care program through an emergency intake process, and if they remain in foster care are move from the Shelter status to the Extended Care. The program provides individual and family services to assist in the necessary adjustments to foster care, and to assist the biological family by helping them resolve the problems, which necessitated placement. This includes, but is not limited to, education and training for parenting as well as role modeling by caseworkers and foster parents.
Facility: Cove Forge Behavioral Health System (A Division of White Deer Run, Inc.)

Program: Inpatient Rehab/Detox
Type of Program: Residential
Address: New Beginnings Road
P.O. Box B
Williamsburg, PA 16693
Phone Number: 800-873-2131
Fax Number: 814-832-2133
Contact Person: Tom Callahan, Regional Administrator

Cove Forge is set amidst 75 forested acres along the Juniata River in Williamsburg, Pennsylvania. Cove Forge offers patients a setting conducive to recovery. Clients begin to learn increased self-awareness, gain an understanding of their interpersonal relationships and receive an education on the disease of chemical dependency.

Cove Forge Behavioral Health System provides a continuum of care that is carefully customized to the patient’s individual treatment needs. Every potential patient begins the treatment experience with a comprehensive evaluation to help diagnose medical, social, emotional and behavioral issues that enable skilled clinicians to guide patients to the appropriate treatment program and level of care. Length of stay is determined by personal medical needs.

Cove Forge’s comprehensive needs assessment and referral center is available 24 hours a day, 7 days a week. Our experienced staff will respond quickly to your call to schedule a free assessment and most insurance plans are accepted.

DETOXIFICATION

Medically supervised detoxification with 24-hour medical observation and therapeutic support, to determine the appropriate level of care for continuing rehabilitation services, and to assist the patient in continuing care planning and arrange for follow-up if detoxification is the only service provided.

Coordination with other departments, services, or programs helps achieve the above goals and transpires via the following avenues:

One-to-one consultation with the clinical staff to determine the appropriate level of care or to coordinate the continued individualized treatment-planning process once the level of care is determined.

Team or group consultation when input from different departments or individuals will result in optimum treatment planning.

Medical coverage consists of physician availability 24 hours a day either by actual presence in the facility or on-call status.

Nursing coverage is provided 24 hours a day, 7 days a week, via three shifts. One RN and one LPN staff each shift. A PRN nursing staff provides coverage when necessary due to absence of full-or part-time staff or when extra staffing is necessary.

A therapist or counselor is available on the unit 7 days a week.
INPATIENT

At Gateway's main facility in Aliquippa, both residential and outpatient rehabilitation are offered. Many patients are treated in the residential rehabilitation program until they have made sufficient progress to transfer to a less restrictive level of care, either at the Aliquippa facility or at one of Gateway's satellite centers. Patients who remain in Aliquippa may continue in the same therapy group if they are participating in the Partial Hospital program.

- Education regarding the natural course of addiction, addicted family dynamics, and requirements for recovery
- Thorough evaluation of a patient's physical, emotional, nutritional, psychological, social, spiritual, family, vocational, mental and other functioning, in light of addiction
- Patient and family input into the treatment planning process.
- Individually designed treatment plans
- Individual therapy
- Group therapy - daily
- Daily meditation
- Writing and sharing of chemical history
- Written tasks assigned to help focus patients and increase level of self-reflection
- Specialized psycho-educational groups sessions
- Journal writing and daily journal sharing groups
- Assigned therapeutic reading
- Family support groups
- Family therapy
- Ongoing nursing and medical evaluation and care
- Vocational counseling
- Pastoral counseling
- Relaxation training
- Team meetings and activities
- Therapeutic recreation, including arts and crafts
- Attendance at Alcoholics Anonymous, Narcotics Anonymous, Al-Anon, Al-Ateen meetings
- Review and processing of relevant videos
- Continuing care planning
- Referrals as appropriate
YOUTH EXTENDED SERVICES AND YOUTH AND YOUNG ADULT PROGRAM

Both the Youth and Young Adult Program and Youth Extended Services (Y.E.S.) Program operate and deliver services with the belief that chemical dependency is a primary, progressive, chronic, and often fatal illness and the manner in which it manifests itself in adolescents is significantly different than in adults. There are three components to both Youth programs: 1) evaluation and diagnosis; 2) primary care treatment; and 3) family treatment. They are carried out in a safe, structured and secure environment with clear boundaries for both the adolescents and family members. Treatment is provided by degreed staff, using group, family, and individual therapy.

Diagnosis and treatment planning is the first phase of treatment and includes further examination on the part of the patient and the staff of the physical, psychological, behavioral, family and other areas included in a biopsychosocial evaluation. Various staff members are involved in this comprehensive evaluation with a physical and medical evaluation accomplished through the nursing assessment and a history and physical by the staff physician. The Psychiatrist will consult with staff as indicated. Drug and alcohol and other biopsychosocial areas are also evaluated by the therapist through interviews with family members. The goals during this phase are for the patient to recognize problems associated with his/her use of chemicals, as well as to recognize the need for help. This phase of treatment lasts approximately three days and provides the necessary information, orientation and motivation for continued treatment.

Focus during the second phase is on further recognition of the pathology of the patient's relationship with chemicals, the unmanageability of the patient's life, and the need for trust in allowing others to help him/her. Identification of patient strengths is vital in this phase. The length of stay during phase two varies according to the needs of the patient, but would last no more than thirty days residential and may include a combination of various levels of care to accomplish the goals. Individual and group therapy are both used, with an emphasis on experiential work.

In the Family Treatment Program, issues of trust, communication, open sharing of feelings, identification, codependency and other family issues are emphasized. Essential components in the family programs are:

1. Family Assessment
2. Multi-Family Group
3. Diagnostic Referral Meeting
4. Individual Family Sessions
5. Family Progress Review
6. Family Program: The Family Program is a required part of treatment with family members receiving approximately 8 hours per week of education and support utilizing educational and discussion sessions on addicted family systems. It provides an opportunity for the family to interact with the patient and begin practicing recovery skills.
Activity-based programming is built into the program structure, included in their treatment plan and is monitored and provided by appropriately trained clinicians. It includes such things as Adventure Based Counseling activities, both on and off the Ropes Course, living skills, theme parties, art therapy, body imaging, cardiovascular conditioning, physical exercise, cultural and educational activities, and leisure time planning. The program helps the patient develop skills necessary for managing their emotions and environment during the recovery process and facilitates the growth of the developmental process of the patient.

Behavior Management: The behavior management system aids the patient in the development of skills necessary to take responsibility for and manage their own behaviors. Patients learn the tools for more effective development and maintenance of relationships through staff interaction in the therapeutic community. The behavior management system is intended to provide the consistency needed for patients to discover a sense of success and conduct themselves appropriately within a group or between individuals. This system is implemented and monitored by the staff and involves ongoing "awareness feedback" regarding a patient's behavior.

Discharge and Continuing Care Planning Process: Each treatment plan review revolves around assessing the various dimensions that indicate the necessary level of care based on the progress of the patient. The patient, family, referral source and other necessary contacts are informed on the projected movement to other levels of care. Discharge planning may include back-to-school sessions, family contracting, and referrals.

Medical Services: The physician for the unit is responsible for all medical protocols and the overall treatment process. The physician is supported in the treatment process by the psychiatrist. Registered Nurses and licensed practical nurse are available 24 hours per day. Detoxification services, when deemed necessary by the physician, are provided in the Detoxification and Assessment Unit.

Psychiatric Evaluation and Treatment: Patients may be referred to the Psychiatrist for a more extensive psychiatric evaluation.

PARTIAL HOSPITALIZATION AND INTENSIVE OUTPATIENT

Outpatient rehabilitation (which includes both Partial Hospital and Intensive Outpatient levels of care) includes the some of the basic building blocks of inpatient care. Group and individual therapy, along with educational lectures and discussions and family programming are all part of these programs. Continuing care planning and referral to self help groups and other community resources are also provided.

Patient education services are provided to patients via the daily lectures presented by our professional staff. These include pertinent lectures on the biochemistry of addiction, the disease concept, the family dynamics of addiction, the relationship of addiction to various medical problems, including AIDS, the importance of nutrition to recovery, other requirements for recovery, the history and importance of self-help groups, need for leisure
time planning, etc. Referrals are made for patients with special educational needs to the OVR Counselor, who refers them to training programs available, and to programs offering education for remedial reading, learning disabilities, and GED training.

A patient who needs to be evaluated by a psychiatrist is referred for evaluation to Gateway's Medical Director or a local psychiatrist.

Gateway's satellite centers have referral agreements with the local Office of Vocational Rehabilitation to provide vocational counseling to patients who need it. OVR also refers appropriate candidates to our programs as part of their vocational rehabilitation. The OVR Counselor is scheduled to see patients as needed. Therapists at all sites provide vocational counseling, including how to return to work, common issues at work, and what to do about them. Back to work sessions may be scheduled by Therapists with EAP as appropriate.

Random drug screening is seen as an adjunct and support to outpatient programs. Gateway's contract with Quest Diagnostic covers drug screens done at the satellite centers.

Follow-up is done through the Therapy Office at Aliquippa in the same process described above, at 30 and 180 days.
Facility: Gateway Rehabilitation Center  
Program: Tom Rutter House - Beaver County  
Type of Program: Residential  
Address: Moffett Run Road, Aliquippa, PA 15001  
Phone Number: 724-375-4461, ext. 1155  
Fax Number: 724-375-7601  
Contact Person: Jill Perry, Program Director  

The target population for Tom Rutter House is drug and/or alcohol dependent males, 18 years old or older, who have received primary treatment for chemical dependency. The service is directed toward those men who need additional treatment time in a structured living environment, either because of the severity or length of their addiction, developmental deficiencies in structuring sober activities of daily living, or because of their pre-treatment living situation was not supportive of recovery.

Treatment at the Tom Rutter House is approached with a variety of modalities, which include the following:

- Assessment
- Treatment Planning
- Establishment of Routine Schedule and Regular Nutrition
- Self Help Groups
- Individual Counseling
- Group Counseling
- Family Counseling
- Peer Group
- Financial Management
- Vocational Counseling
- Reading Assignments
- Journal Writing
- Relaxation/Stress Management
- Recreation/Leisure Time
- Therapeutic Task Assignments

When a resident presents specific treatment issues as gay/lesbian, dually diagnosed, cultural specific needs or criminal issues, a track is developed with the resident within the individual treatment plan. The use of workbooks and individual sessions and community referrals are also used to address these specific issues as to enhance the treatment plan. Staff receives ongoing training related to gender specific services.
Facility: Gateway Rehabilitation Center
Program: Moffett House - Beaver County
Type of Program: Residential
Address: 1215-1217 Seventh Avenue
Beaver Falls, PA 15010
Phone Number: 
Fax Number: 
Contact Person: Jill Perry, Program Director

The target population for Moffett House is drug and/or alcohol dependent males, 18 years old or older, who have received primary treatment for chemical dependency. The service is directed toward those men who need additional treatment time in a structured living environment, either because of the severity or length of their addiction, developmental deficiencies in structuring sober activities of daily living, or because of their pre-treatment living situation was not supportive of recovery.

Treatment at the Moffett House is approached with a variety of modalities, which include the following:

- Assessment
- Treatment Planning
- Establishment of Routine Schedule and Regular Nutrition
- Self Help Groups
- Individual Counseling
- Group Counseling
- Family Counseling
- Peer Group

- Therapeutic Task Assignments

When a resident presents specific treatment issues as gay/lesbian, dually diagnosed, cultural specific needs or criminal issues, a track is developed with the resident within the individual treatment plan. The use of workbooks and individual sessions and community referrals are also used to address these specific issues as to enhance the treatment plan. Staff receives ongoing training related to gender specific services.
The Residential Treatment Center views substance abuse as a disorder of the whole person, affecting some or all areas of functioning and reflecting impeded personality development or chronic deficits in social, educational, and economic skills. Its antecedents lie in socioeconomic disadvantage, in poor family effectiveness, and in psychological factors. Thus, the problem is the person, not the drug. Addiction is a symptom, not the essence of the disorder. Abuse of any substance is viewed as over-determined behavior. Physiologic dependency is secondary to the wide range of influences that control the individual’s drug use behavior.

The principle aim of the Residential Treatment Center is a global change of lifestyle: abstinence from illicit substances, elimination of anti-social activity, employability, and pro-social/cultural values. The rehabilitative approach requires multidimensional influence and training, which for most can only occur in a 24-hour residential setting.

The Residential Treatment Center can be distinguished from other major drug treatment modalities in three broad ways. First, it coordinates a comprehensive rehabilitative offering in a single setting. Group and individual therapy, work therapy, recreation, education, medical, family, legal, vocational and social services occur within the structure.

Second, the primary “therapist” and teacher in the Residential Treatment Center is the community itself, consisting of peers and staff whom role model successful personal change. Staff members also serve as rational authorities and guides in the recovery process.

Thus, the community as a whole provides a crucial 24-hour context for continued learning in which individual change in conduct, attitudes and emotions are monitored and mutually reinforced in the daily regime.

Third, it has an approach to rehabilitation based on an explicit perspective of the drug abuse disorder, the resident, and the recovery process. It is this perspective that shapes its organizational structure, staffing, and treatment process.

House of the Crossroads’ Residential Center is licensed by the Pennsylvania Department of Health, Bureau of Drug and Alcohol Programs.

The Residential Services of Mon Yough Community Services, Inc. enable individuals to experience and achieve personal growth and fulfillment. These services encourage independence, skill development and community integration in home and apartment settings throughout the Mon Valley.

Our dedicated and quality-driven staff emphasizes Self-Determination and consumer autonomy in order to assist consumers in making independent choices and taking responsibility for these choices in an environment that is nurturing and supportive.

**Supported Housing Program** enables mental health consumers to experience personal growth through various treatment modalities and approaches that allow for successful community living and prevention of hospitalization. This affords consumers the opportunity to strengthen coping skills for dealing with the symptoms of their mental illness. Such programs include Enhanced Care, Full Care, Minimal Care, Supported Housing, Geriatric and Comprehensive Mental Health Personal Care Homes.

**Comprehensive Mental Health Personal Care Home** offers consumers a home as long as they want. These services provide consumers the opportunity to develop relationships in a family atmosphere, while encouraging skill development and a chance to integrate into the community as a valued and productive member.

For more information or to schedule an appointment, please call 412-673-4133 or e-mail at admin@mycs.org.

In-Home Services
In-Home Services offers habilitative aid services to individuals living in their homes with their loved ones. These services provide personal, social and nursing care specifically designed around the persons needs.

For more information or to schedule an appointment, please call 412-675-8999.

801 Shaw Ave., McKeesport

The Community Living Arrangement (CLA)
Program offers consumers with developmental disabilities a feeling of contentment and satisfaction in a nurturing and home-like environment. Utilizing feedback and input from consumers and their families, we are able to identify and ensure continuous quality improvement and customer satisfaction. We strive to empower consumers to direct how their services are implemented and to have control over their lives. Such programs include semi-independent living and 24-hour awake supervision; with medication administration, transportation, personal care, financial assistance and oversight of all medical, emotional, physical and environmental concerns.

Residential Non-Hospital Rehabilitation
Clients in our residential program will receive education, therapy, and medical care. Our residential program is based on the 12-step model and AA/NA meetings are an integral part of our treatment regimen. The program is highly structured with minimal free time. We treat clients who are participating in methadone maintenance programs and assist them in continuing their methadone treatment through arrangements with providers of that service.

Dual Diagnosis Component
Dually diagnosed clients will receive psychiatric care while enrolled in our residential and halfway house programs. Clients will be monitored and will receive proper medication to address their psychiatric diagnosis while participating in chemical dependency rehabilitation programming. Clients must meet DSM IV Axis I diagnostic criteria for both chemical dependency and mental health disorder.

**Long-Term Programming**

In cases of extensive criminal justice involvement or numerous relapse experiences, a longer-term residential program can be helpful. This program offers the same level of intensity as our residential non-hospital rehabilitation program for an extended period of time. Additional aspects of the long-term program include personal financial management with an emphasis on restitution, fines and costs, employment readiness training, community service work and addressing criminal thinking and behavior.

Our halfway house programs offer an environment that is based on continuing recovery from addiction. These programs are designed to meet the needs of men who have fulfilled the requirements of a residential program and need to continue recovery within a safe, sober and structured environment. Clients participate in life skills, job training and readiness, daily community meetings, AA/NA meetings and regular drug and alcohol screenings to ensure program compliance. We offer a special focus on criminal justice clients.

Our halfway house programs offer an environment that is based on continuing recovery from addiction. These programs are designed to meet the needs of women who have fulfilled the requirements of a residential program and need to continue recovery within a safe, sober and structured environment. Clients participate in life skills, job training and readiness, daily community meetings, AA/NA meetings and regular drug and alcohol screenings to ensure program compliance.

Women’s issues such as domestic violence, sexual abuse, motherhood and others are addressed during the client’s stay in the program.

Pine Ridge Manor accepts and treats women who have a dual diagnosis of substance abuse and a mental health diagnosis.
POWER Halfway House

Our halfway house, also referred to as POWER House, is a 25-bed residential substance abuse treatment program for adult women ages 18 and older. It is designed to bridge the gap between treatment and a woman’s return to the community. Although individualized to meet the diverse needs of women, the program generally provides care for up to 6 months and focuses on building a foundation in early recovery and helping women develop tools that will help them achieve and sustain sobriety. Over time, women begin to reconnect to the community with the goal of becoming self-sufficient.

Women 18 and older who are struggling with substance abuse and dependency are eligible for POWER’s treatment programs. POWER accepts women with co-occurring disorders and women who are pregnant. In fact, priority is given to women who are pregnant, parenting or IV drug users. We also accept women from the Drug Court Program.

Treatment and support services at our Halfway House include:

~ Screening & Assessment  
~ Individual, Group & Family Therapy  
~ Alcohol & Other Drug Education  
~ Life Skills Development  
~ Parenting Education & Support for Family Reunification  
~ Resource Coordination/Case Management  
~ Support for 12-Step Involvement  
~ HIV/AIDS Counseling & Testing  
~ Relapse Prevention Classes  
~ Discharge Planning & Follow-Up

Facility: Renewal, Inc. and Renewal Treatment, Inc.

Program: Inpatient Treatment

Type of Program: Residential

Address: 704 Second Avenue, Sixth Floor

Pittsburgh, PA 15219 (Allegheny County)

Phone Number: (412) 697-0110

Fax Number: 412-697-0093

Contact Person: Steve Devlin, VP Program Management – 412-580-4664

Program Description:
The mission of Renewal, Inc. states, “Dedicated to the renewal of individuals in the criminal justice system and to their return to society as responsible citizens.” Renewal, Inc. believes in the positive integration and rebuilding of offenders’ lives by offering education, job readiness, counseling, community service, opportunities for drug & alcohol therapy, as well as social readjustment by redefining life goals and values and cognitive restructuring. The program promotes work release opportunities, assists in recovery, increases accountability and reduces recidivism with the assurance of promoting public safety. The program is also cost effective for the taxpayer and a safety valve for the criminal justice system. Residents live in a controlled environment, which offers stability and encourages confidence in self. Skilled monitors and case managers supervise residents 24 hours a day. Residents attend Alcoholics/Narcotics Anonymous meetings and receive individual and group counseling.

Renewal, Inc. has incorporated a cognitive/behavioral approach in addressing the criminal mindset of our residents. The program, which is currently based on the “What Works” curriculum, is an approach that has been proven by research to effectively address the needs of the offender and provide the maximum benefit. The criminogenic needs unique to an offender are identified at the very beginning by administering a standardized instrument. Presently, Renewal, Inc. uses an instrument called the Level of Service Inventory - Revised (LSI-R).

The Cognitive program assists residents in identifying faulty worldviews that lead to criminal thinking and behavior. The Thinking for a Change program is a multi-level program consisting of three progressive phases. Life skills and basic education classes are offered. Job placement specialists and an extensive network of employers are available to clients. In addition to supportive services, part of Renewal, Inc.’s success lies in its residents committing to community service work. Residents help numerous non-profit agencies, churches, local government, civic organizations, etc., annually. Renewal, Inc. residents provide thousands of hours of volunteer community service every year to the Pittsburgh area. Renewal, Inc.’s programs enable residents to be productive citizens and reduce the number of repeat offenses. The Renewal, Inc. program also relieves the overcrowding of traditional prisons while ensuring public safety.
The safety and security of the community to which residents are released is of utmost importance. Residents are prohibited from consumption of alcohol and illicit drugs. Residents and visitors are subject to search upon entering the premises. Staff and residents are prohibited from carrying any type of weapons. All residents are tested for alcohol consumption upon each entry and are subject to randomly scheduled urinalysis to assure a program free of illicit alcohol and drug use. Staff make frequent phone and on-site verifications of scheduled activities to ensure resident accountability. The facilities are supervised twenty-four hours a day with adequate staffing on all shifts. Residents are required to follow an approved weekly schedule of activities, and residents eligible for work release and outside activities must sign in and out of the facility under staff supervision.

Renewal Treatment Inc. (RTI) is a private, non-profit treatment entity of Renewal, Inc. RTI was formed to provide a continuum of specialized addictions treatment services for individuals in the criminal justice system. Both inpatient and outpatient services are offered. Individualized substance abuse counseling services are provided to residents. In treating the criminal addict, cognitive distortions must be addressed in order for a successful treatment outcome. Therefore, RTI believes we must address the addiction and criminality simultaneously using a cognitive behavioral model.

Individuals who are referred to RTI undergo a thorough evaluation. Assessments such as the Substance Abuse Subtle Screening Inventory (SASSI) and Level of Service Inventory-Revised (LSI-R) are administered. The appropriate care is determined by the client’s needs, the history of treatment, and the PA Client Placement Criteria (PCPC). Treatment includes proven clinical interventions that address client specific problems. All participants in the program receive a comprehensive aftercare plan.

Renewal Treatment Inc., Renewal, Inc.’s sister company, was first licensed to provide drug and alcohol treatment services in September 2002. RTI has maintained the licensure with the Pennsylvania Department of Health, Bureau of Drug & Alcohol Licensing, in good standing, since the inception of services.

In December of 2005, Renewal Treatment Inc.’s inpatient Drug and Alcohol program was dedicated as the William J. Schofield III Renewal Treatment Center, in recognition and memory of one of Renewal’s founding leaders. His life was dedicated to service to the community in many aspects, and he had a particular interest in the rehabilitation of the addicted offender, and for continuing research in the addictions field.

**Mental Health Residential Services**

Residential Services provides support for continuing development of life skills. Life skills include but are not limited to, the following areas: money management, meal preparation and nutrition, personal needs, socialization/relationships, vocational/educational pursuits, overall health needs and any specific interests an individual would like to pursue. Life skills assistance can be provided for a brief or extended period of time. Mental Health Residential Services strives to offer varying levels of support based on each individual’s needs. Services range from homes with 24-hour staff support to independent living with Supported Housing services.

Specialized Community Living provides increased supports for individuals needing intensive supports while living independently.
Facility: Turtle Creek Valley MH/MR, Inc.

Program: Diversion and Acute Stabilization Program (DAS)

Type of Program: Residential
Address: 1800 West Street, Rear
Homestead, PA 15120

Phone Number: 412-462-9901
Fax Number: 412-462-4901
Contact Person: Kathy Becker - Allegheny County

**Diversion and Acute Stabilization Program (DAS)**
The DAS Program offers intensive short-term residential psychiatric and dual recovery services that may be used as an alternative to inpatient treatment or as an interim level of care for persons being discharged from inpatient care. Treatment includes the opportunity to participate in the Partial Hospitalization Program. For individuals with dual treatment needs, both DAS and Partial Hospitalization offer specialized services, while supporting ongoing participation in dual recovery meetings in the community. DAS residential staff supports individuals with daily living activities and medication/health needs, along with coordinating recreational opportunities. DAS offers a structured residential treatment setting where individuals can make significant improvements in stability, developing the foundation for ongoing recovery.

Alternative Contact: | 

**Semi-Independent Living**

The individuals who receive support from the Semi-Independent Program live in their own apartments in the Brinton Manor Complex in North Braddock. They receive up to 30 hours of staff support each week. Supports are individualized to meet the needs of the participants. The staff assists with medical appointments, meal planning, budgeting and bill paying.

Individuals are assisted in accessing community resources for recreational and leisure activities. The development of peer relationships is a key part of the program.

**Mental Retardation Residential Services**

Choices of residential services range from Community Homes for Individuals with Mental Retardation (CHIMRs) where supports are provided on a 24-hour per day basis to Semi-Independent and Supported Living where supports are offered in the individual’s home or apartment so they can live independently. Participants in all services are assessed to determine their support needs in areas such as daily living skills, home management, budgeting, shopping, safety skills, community awareness and recreation. The goal is to help every participant develop independence within their home and community.

White Deer Run is one of the leading systems in the nation for the treatment of drug and alcohol addiction. The main facility, located in Allenwood, Pennsylvania, is situated on 150 acres of beautiful countryside. White Deer Run also operates three other inpatient facilities located in Lancaster, Lebanon and Kempton, PA, as well as the Cove Forge Behavioral Health System, consisting of six treatment sites. Each of White Deer Run’s facilities provides a relaxed atmosphere that lends itself to personal reflection and healing for adults and adolescents alike.

White Deer Run’s Philosophy simply states that each patient will be treated as an individual, receiving a treatment plan tailored to their specific needs. The goal for each patient is unchanging: to realize a full and rewarding lifestyle, free from chemical dependence.

**Key features of all treatment programs include:**

- Twelve Step Program Model
- Transportation provide to and from Treatment
- Highly skilled, multi-disciplinary teams of professionals
- Individually determined length of stay
- Comprehensive medical evaluation
- Psychological evaluation when indicated
- Individual and group therapy
- Weekend family program (ages 15 and above)
- Twenty-four hour daily medical staff
- Individualized aftercare plan
- Continued schoolwork or GED preparation for adolescents during their stay

**Treatment Programs:**

- Detox
- Adult Drug and Alcohol Program
- Female Dual Diagnosis
- Male Dual Diagnosis
- Relapse Awareness Program
- Short Term Adolescent Program
- Criminal Justice Program
- Adolescent Extended Care Program

**Acute Partial Hospital – Candace Ross**  
**724-337-9067**  
The Adolescent Partial Program was developed to fill a gap in services that currently exists in the Allegheny Valley area in order to meet the needs of consumers 14 and older with severe behavioral or emotional problems who are not able to function within a traditional school setting.

The advantage of having a program jointly managed between FSWP and Highlands School District is the ability to integrate the expertise of each program.

The school district has the experience in providing specialized educational services and FSWP has the expertise in providing behavioral health services to adolescents with severe emotional problems.
Social Rehabilitation – Stephanie Santoro
724-337-9067
FSWP is utilizing the Boston University (BU) Model of Psychiatric Rehabilitation, to enhance the social skills teaching provided in Social rehabilitation. The BU model is based on the “choose-get-keep approach, focusing on role recovery, in this case facilitating the recovery of social role. Its emphasis is on goal setting, and stresses client preference and availability. A rehabilitation goal is formed that includes what the consumer wishes to accomplish, including how much they’d like to participate, and how much interaction or involvement they’d also like to have in Social Rehabilitation. The model includes a planned format of assessing consumer’s functioning in several life domains, rehabilitation goal planning, and skill teaching to produce the desired outcomes consistent with a person’s cultural environment.

**PARTIAL HOSPITALIZATION AND INTENSIVE OUTPATIENT**

Outpatient rehabilitation (which includes both Partial Hospital and Intensive Outpatient levels of care) includes the some of the basic building blocks of inpatient care. Group and individual therapy, along with educational lectures and discussions and family programming are all part of these programs. Continuing care planning and referral to self help groups and other community resources are also provided.

Patient education services are provided to patients via the daily lectures presented by our professional staff. These include pertinent lectures on the biochemistry of addiction, the disease concept, the family dynamics of addiction, the relationship of addiction to various medical problems, including AIDS, the importance of nutrition to recovery, other requirements for recovery, the history and importance of self-help groups, need for leisure time planning, etc. Referrals are made for patients with special educational needs to the OVR Counselor, who refers them to training programs available, and to programs offering education for remedial reading, learning disabilities, and GED training.

A patient who needs to be evaluated by a psychiatrist is referred for evaluation to Gateway's Medical Director or a local psychiatrist.

Gateway’s satellite centers have referral agreements with the local Office of Vocational Rehabilitation to provide vocational counseling to patients who need it. OVR also refers appropriate candidates to our programs as part of their vocational rehabilitation. The OVR Counselor is scheduled to see patients as needed. Therapists at all sites provide vocational counseling, including how to return to work, common issues at work, and what to do about them. Back to work sessions may be scheduled by Therapists with EAP as appropriate.

Random drug screening is seen as an adjunct and support to outpatient programs. Gateway’s contract with Quest Diagnostic covers drug screens done at the satellite centers.

Follow-up is done through the Therapy Office at Aliquippa in the same process described above, at 30 and 180 days.

Gateway’s satellite centers have referral agreements with the local Office of Vocational Rehabilitation to provide vocational counseling to patients who need it. OVR also refers appropriate candidates to our programs as part of their vocational rehabilitation. The OVR Counselor is scheduled to see patients as needed. Therapists at all sites provide vocational counseling, including how to return to work, common issues at work, and what to do about them. Back to work sessions may be scheduled by Therapists with EAP as appropriate.

Random drug screening is seen as an adjunct and support to outpatient programs. Gateway’s contract with Quest Diagnostic covers drug screens done at the satellite centers.

Follow-up is done through the Therapy Office at Aliquippa in the same process described above, at 30 and 180 days.

PARTIAL HOSPITALIZATION AND INTENSIVE OUTPATIENT

Outpatient rehabilitation (which includes both Partial Hospital and Intensive Outpatient levels of care) includes some of the basic building blocks of inpatient care. Group and individual therapy, along with educational lectures and discussions and family programming are all part of these programs. Continuing care planning and referral to self help groups and other community resources are also provided.

Patient education services are provided to patients via the daily lectures presented by our professional staff. These include pertinent lectures on the biochemistry of addiction, the disease concept, the family dynamics of addiction, the relationship of addiction to various medical problems, including AIDS, the importance of nutrition to recovery, other requirements for recovery, the history and importance of self-help groups, need for leisure time planning, etc. Referrals are made for patients with special educational needs to the OVR Counselor, who refers them to training programs available, and to programs offering education for remedial reading, learning disabilities, and GED training.

A patient who needs to be evaluated by a psychiatrist is referred for evaluation to Gateway's Medical Director or a local psychiatrist.

Gateway’s satellite centers have referral agreements with the local Office of Vocational Rehabilitation to provide vocational counseling to patients who need it. OVR also refers appropriate candidates to our programs as part of their vocational rehabilitation. The OVR Counselor is scheduled to see patients as needed. Acute Partial Hospitalization Program - 331 Shaw Ave., McKeesport - 412-675-8585

The Acute Partial Hospital program offers an intensive, comprehensive, structured program of services and interventions that are goal directed and based on documented treatment plans. Individuals in the Acute Partial program will be seen by a physician for assessment and interventions, medication adjustments as necessary and evaluation of treatment. The program is designed to accommodate the needs of adults with a broad spectrum of psychiatric disorders that require more intensive treatment than provided at lower levels of care.

Adult Outpatient Services - 331 Shaw Ave., McKeesport - 412-675-8585

Our clinicians provide therapy tailored to the individual needs of our consumers. This client-centered approach includes brief therapy as well as treatment for ongoing problems. Services include individual and group counseling and evaluation and medication management.

Clozaril program - 331 Shaw Ave., McKeesport - 412-675-8585

MYCS provides a comprehensive Clozaril program. Through our program, we educate our consumers, provide supervision and coordinate necessary blood tests.

Rehabilitation Services - 332 Fifth Ave., 2nd floor, McKeesport, PA 412-675-8871

Rehabilitation services will assist persons, 18 years or older, with moderate to severe functional disabilities resulting from mental illness. Our goal and mission is to help the consumer develop, enhance, regain or retain psychiatric stability, social competencies with the community, make personal adjustments, teach independent living skills to maintain or gain employment, and provide educational instruction so that the consumer can achieve the most satisfaction from the environment of their choice and assist them to function as independently as possible.

The Center for Substance Abuse - 335 Shaw Ave., McKeesport - 412-675-8585

The Center for Substance Abuse offers treatment services to individuals affected by substance use/abuse disorders. Services provided include individual, group, and Intensive Outpatient. In addition to treatment services, The Center for Substance Abuse offers HIV
testing and counseling, homeless services and case management services provided by Recovery Support Services.

Children Outpatient Services - 331 Shaw Ave., McKeesport

Woman, Children, Adolescent Services provides a comprehensive “One Stop Shop”, sensitive to the needs of women, children, adolescents and families whose lives have been affected by addiction or mental health problems. We also specialize in the complicated nature of physical abuse, sexual abuse and neglect. Services include Outpatient, Intensive Outpatient, group Student Assistance and Prevention services. For more information or to schedule an appointment, please call 412-675-8585.

Partial Hospitalization Program
(with optional transitional housing)
This level of care is offered to clients who are in need of a structured program but who do not need the intensity of an inpatient program.
Facility: Turtle Creek Valley MH/MR, Inc.
Program: Partial Hospitalization Program/IOP
Type of Program: Partial
Address: 1800 West Street, Rear
         Homestead, PA 15120
Phone Number: 412-462-9901
Fax Number: 412-462-4901
Contact Person: Susan Crist - Allegheny County

Partial Hospitalization Program/IOP
For adults 18 years of age or older, this program offers intensive psychiatric and dual recovery (mental health/substance abuse) treatment, including individual/group therapy and psychiatric consultation, five days a week. Specialty treatment is provided within the program for individuals with dual treatment needs. Supports are provided to encourage ongoing participation in community recovery meetings. Group treatment includes early recovery, anger management, health and medications, relationships, stress management, transitions and positive thinking. Treatment is based on the wide-ranging needs of individuals who can benefit from an intensive treatment program.
Zoar Addiction Treatment takes the form of licensed partial hospitalization, known as "day treatment". Women participate in a five-day a week program consisting of individual therapy, group therapy, life skills training, women-centered relapse prevention and spirituality groups. Childcare is available for children up to age 5, while a woman is in treatment. This is at no cost to the woman. Bus tickets are provided for women to attend treatment. All treatment is women-centered and focuses on logistical, relationship, and emotional barriers that are particular problems for women in early recovery. Treatment is strengths-based and includes awareness of trauma as a barrier to recovery.

Zoar NewDay has no prior clean time requirement. Self-referrals are accepted as well as referrals from any private or public agency. Women must be either MA eligible or have no health insurance in order to participate. We recommend that a woman participate for a minimum of 3 months, but this is individually determined. A woman who is doing well in treatment might be stepped down to 3 days a week after 3-4 months. All treatment occurs at the Wilkinsburg location, which is very accessible to bus transportation.

A woman needing only individual counseling sessions can also come to Zoar NewDay. Individual sessions are offered primarily as a final step-down, although a woman with some clean time might be approved initially for individual treatment.

Mental Health Records (to include evaluation, treatment, and discharge information)
HIV or AIDS Status

A separate authorization is required for disclosure of information concerning the drug and alcohol treatment program

IMPORTANT: Your signature on this form allows ACHS to disclose information from your medical record. This may include mental health, your HIV or AIDS status, and other sensitive information. If there are portions of your record that you do not want ACHS to disclose please specify below:

Do not release the following information from my medical record: ___________________________.

INFORMATION ABOUT YOUR RIGHTS

- The release of your records will be for the purpose stated, and only those items indicated will be released.
- The minimum amount of information that is needed for the intended purpose will be released. The Medical Records Manager, the Director of Nursing, or another member of the clinical staff will make this determination.
- Unless required by law, ACHS will not release information from your medical record without your consent.
- The quality of your medical care by ACHS will not be dependent on whether or not you sign this release.
- Records released by ACHS may possibly be re-disclosed by the requesting facility, thus voiding the HIPAA Privacy Rule. ACHS and its staff bear no responsibility, and are not liable for the results of such re-disclosure.
- This authorization will remain in effect for 60 days from the date of your signature. You have the right to revoke your authorization at any time. Such revocation must be submitted to ACHS in written form.
- Your decision to revoke this authorization does not apply to any records that may have been released prior to the date that you signed a request to have this authorization revoked.

I am signing this authorization voluntarily, and with a complete understanding of its content. I have been given the opportunity to ask questions and to have those questions answered to my satisfaction. I further understand that if I would like a copy of this authorization one will be provided for me.

Federal rules restrict any use of this information to criminal investigation or prosecution of any substance abuse patient.

ACHS 166b
Rev. 4/04
FSWP is uses the Boston University (BU) Model of Psychiatric Rehabilitation that is based on the “choose-get-keep” approach, focusing on role recovery in living, learning, working, and social environments. Its emphasis is on goal setting, and stresses client preference and availability. A rehabilitation goal is formed that includes what the consumer wishes to accomplish, where (in what environment), and when it will be accomplished (time frames). The model includes a planned format of assessing readiness for goal setting, functional assessment, identification of needed and preferred skills and supports, skill teaching and managing supports and resources to produce the desired outcomes consistent with a person’s cultural environment.
Student Assistance Program – Tina Zimmerman
724-334-7230
Staff serve on the school-based Student Assistance Core team to provide mental health expertise to the members on the team as well as mental health and drug and alcohol assessments of students identified by the team as in need of this service. The SAP worker may also provide appropriate prevention services to students and/or school personnel; such as psycho-educational or support groups, classroom presentations, and in-service trainings. SAP Liaisons also provide postventions and crisis intervention services in the event of a school or student crisis.

Community Services - Sherly Strotheres
724-334-7230
To provide consultation and collaborative planning to enhance the level and/or quality of services being provided in other community agencies or family support centers. This may involve providing direct clinical consultation, staff training or program consultation. The goal is to improve the degree of family functioning in the community.
Maverick Drop-In is a Social Supportive & Educational Program that encourages members to become independent, empowered and to advocate for themselves. Maverick is a place that you may come and be yourself; where you can feel at home. Many activities happen at Maverick Drop-In Center. These activities are determined by the members and staff.

House of the Crossroads Housing & Supportive Service Center is managed within a Therapeutic Community framework, which provides management of the participants’ addiction and promotes their acceptance of personal responsibility and self-sufficiency. This framework is based on ideas of collective responsibility, citizenship and empowerment. Therapeutic communities are deliberately structured in a way that aims to encourage responsibility and avoid unhelpful dependency on professionals. The core service need is met by the provision of on and off site (taking the services to the participant in their home) supportive service delivery. The supportive services are aimed at enabling participants to develop the capacity for obtaining and remaining in permanent housing, increasing their skills and or income and to achieve self-sufficiency. Housing services are independent however structured with rules and guidelines that ensure the safety of all the residents participating in the housing and supportive service program.

The U. S. Department of Housing & Urban Development (HUD) recognized House of the Crossroads Housing and Supportive Service Center as a Model Project for high performance. The project will be featured in the U. S. Department of Housing & Urban Development (HUD) Technical Assistance Manual for best practices.
HIV Early Intervention
This program provides free and confidential HIV testing and counseling, HIV/STD education for staff and clients, case management services, and client-centered risk reduction. Our goal is to provide HIV/AIDS services to all of our Drug & Alcohol clients. Services are provided in the Pittsburgh area.

Health for the Homeless
The goal of this program is to provide homeless persons with access to medical and D&A treatment services. We provide referrals and transportation to detoxification, inpatient and mental health treatment, as well as medical and dental care and dental prescriptions.

Heterosexual/IDU’s Focus on African Americans
This program was designed to have an impact on continued high-risk behaviors of the Intravenous Drug User (IDU) population, with an emphasis on heterosexual African Americans. Our trained and dedicated outreach workers provide mini HIV messages, condom demonstrations, group educational sessions and referrals.

HIV Case Management Women & Children Project
MYCS provides case management and counseling services for HIV+ women and their families/significant others and for women who are at high risk.

HIV Testing Site Mon Valley Services
MYCS provides confidential HIV testing and prevention messages in Allegheny County.

For more information or to schedule an appointment, please call 412-675-8865
335 Shaw Ave., 2nd floor
McKeesport, PA

Allegheny County Jail HIV Risk Reduction Project
We provide one-on-one client-centered risk reduction and HIV education to inmates of the Allegheny County Jail, with a focus on minority populations. Our goal is to impact continued high-risk behaviors within this population.

Facility: Mon Yough Community Services, Inc.

Program: Recovery Support

Case Management
Management is here to assist those who have mental health problems and have difficulty managing the routine challenges of daily living. For children that may mean getting necessary supports and services to succeed in school. For adults it may involve identifying options for housing and income. In all cases, the plan for service is tailored to the needs and personal goals of the individual in service. An individual may be served by one of three levels of case management depending on the need for support.

Administrative Case Managers (ACM) provide service as needed when a person, who is otherwise stable in the community, has a specific need for assistance. Examples of assistance provided include accessing entitlements, helping with housing problems and accessing community supports and services.

Targeted Case Managers provides continuous and regular support for those whose needs are more complex and persistent and also provide the most intensive support for those who are most challenged by mental illness.

Children’s Case Managers provide all three levels of case management for their clients. These individuals are devoted solely to assisting children, adolescents and their families in navigating the complicated children’s system of service delivery.

For more information or to schedule an appointment, please call 412-675-8480

Location: Case Management – 500 Walnut St.
2nd floor, McKeesport, PA

Outreach
The MYCS Outreach Program delivers psychiatric care and services to people in their homes. This program is available to those who are homebound, as well as to those for whom traditional services have not been effective. Our team approach includes a doctor, nurses, a social worker and a Community Integration Specialist. The Intensive Community Outreach Program serves a small number of clients with a high level of care and services provided by a multidisciplinary team.

**Vocational Business Alliance:**

Market Street Mail Services - 500 Market St., McKeesport

Individuals served by Market Street Mail are provided the opportunity to develop their own heightened sense of self worth through the pride and satisfaction, which comes from earning a pay check and performing a needed consumer service. Market Street Mail contracts with community businesses, offering a consistent source of income for individuals living with challenges.

Clean Sweep Janitorial Service - 500 Market St., McKeesport

Clean Sweep Janitorial offers individuals the training, support, and opportunity to perform a valuable service to their community while developing self esteem through earning a competitive wage; contracts with businesses in the local and Greater Pittsburgh areas offer variety of work experiences within the community.

The Corner Café - 500 Market St., McKeesport

The Food Service program provides individuals interested in catering, fast food, and cafeteria-style food preparation with valuable training opportunities. Instruction offered encompasses health department regulations, food preparation techniques, kitchen safety, and everyday home kitchen skills.

Community Access Day Services/C.A.D.S. - 500 Market Street, McKeesport

The Community Access Day Service assists interested participants in attaining the highest possible level of inclusion in community life to those who have for so long faced barriers to integration. Support staff offer assistance to both the individual and their non-challenged peers in order to facilitate mutual communication, understanding, and respect. Participants choose to develop their talents and give back to their community through meaningful work and social activities, in addition to volunteer work.

Opportunities Unlimited/ATF - 2811 Liberty Way, Liberty Boro
The Opportunities Unlimited/Adult Training Facility offers a full range of opportunities for individuals serviced in areas including, but not limited to: pre-vocational training, life skills, social/community skills, and homemaking skills. Activities offer personalized assistance based on the aptitudes and needs of each participant.

**Senior’s Connection - 500 Market St., McKeesport**

The Senior’s Connection offers assistance to those individuals who wish to make the transition from vocational to post-vocational activities, while still maintaining valuable skills acquired during their working years. Participants may opt to challenge themselves with new skills as well.

For more information on MYCS’ Twin Rivers Employment Services, Opportunities Unlimited/ATF, Community Access Day Services, and Senior’s Connection, please call 412-675-8540.

For more information on MYCS’ Market Street Mail, Clean Sweep Janitorial Services, the Corner Café and CADS or to schedule an appointment, please call 412-672-3400.

Case Management
To assure that consumers, which includes adults and children, gain entry to the mental health system and other Family Services of Western PA Services in a timely manner. Services provided include: obtaining authorization of service, referral to specialized services and other community services, monitor quality of service delivery, coordinate outpatient commitment hearings, and provision of emergency services during daytime hours.
Facility: Turtle Creek Valley MH/MR, Inc.  
Program: Service Coordination Unit  
Type of Program: Miscellaneous Services  
Address: (Administration Office) 723 Braddock Avenue  
Braddock, PA 15104  
Phone Number: 412-351-0222  
Fax Number: 412-381-2004  
Contact Person: Janice Burruss, Director of Access and Case Management - Allegheny County

To be referred to services or to find out more information about the services that TCV MH/MR, Inc. provides, please call the Intake Department at 412-351-0222

We Provide:
- Recovery focused behavioral health services for individuals who choose to lead a drug and alcohol-free lifestyle and/or to reduce potential harm associated with substance abuse.
- A wide range of day and vocation supports to individuals with developmental disabilities.
- Supportive services in developing life skills in the areas of stress management, conflict resolution and family relationships.
- Services to individuals who are having difficulties with mental illness.
- Fees for treatment services are determined using a sliding fee schedule when individuals/families have no insurance coverage.

The Service Coordination Unit performs the functions of service monitoring, linking and advocating for consumers. Consumer care is closely monitored throughout treatment - from the first phone call to termination. An Intake Clinician will assess the situation of individuals requesting services, provide information, referral and/or schedule an appointment for a clinical assessment.

Intake
An intake worker assesses the situation of a caller requesting service. Then a referral to the appropriate treatment provider is made. An appointment for a clinical assessment can be made at this time.
Facility: Turtle Creek Valley MH/MR, Inc.

**Resource Coordination and Intensive Case Management**

Serving individuals with mental illness who need assistance in accessing, coordinating and monitoring of resources and services. Staff works closely with consumers to provide case coordination in all life skill areas. Primary services include monitoring, linking, coordination and advocacy. These programs have been successful in helping persons achieve stabilization of their illness and symptoms. ICM and RC staff are also available after normal business hours for intervention services, if needed.

*Nancy Folino*
Supervisor

**24 Hour Service**

The Service Coordination Unit provides 24-hour/7 day a week telephone support services. Crisis support staff assesses the nature of the problem being presented by each caller. Crisis support staff provides verbal interventions necessary to stabilize the situations. Crisis support staff will develop a plan with the caller to resolve the situation. The plan may include making a referral to the appropriate agency service, arrangements for an evaluation at a local hospital, or making arrangements for an on site emergency psychiatric visit from Allegheny Crisis & Emergency Services. Our staff also provides post crisis/disaster intervention, debriefings and follow-up.

| Alternative Contact: | |

**Adult Training Facility**

TCV operates two ATF day programs: Steel Valley ATF in Homestead and the St. Robert’s ATF located in East McKeesport. Both sites are accessible to those who have physical challenges.

The service and supports provided at the ATFs are tailored to the needs and choices of the participants. Family involvement in all aspects of the program is encouraged. The program offers a unique blend of opportunities that range from training in areas such as cooking, home management, health maintenance and job readiness to social/recreational activities such as picnics, bowling, movies, exercise groups, trips to local attractions and sporting events. The primary focus of the ATFs is to provide vocational and social training as relevant to working in the community. The programs offer community-and facility-based employment opportunities such as assembly work, lawn care, housekeeping, vehicle maintenance, paper shredding and more. Jobs vary with the interests of the participants.

TCV’s program goals are to develop the skills necessary for the individual to obtain and maintain work competencies. The vocational opportunities encourage workplace diversity, integrated employment opportunities, social relationships, self-management skills, empowerment and the opportunity to earn a wage.
Facility: Turtle Creek Valley MH/MR, Inc.

Program: Mental Retardation Services – Community Link Program

Type of Program: Miscellaneous Services

Address: St. Robert Bellarmine School
1301 5th Avenue, First Floor
East McKeesport, PA 15035

Phone Number: 412-823-0600
Fax Number: 412-823-6665

Contact Person: Dave Chara – Day/Voc Coordinator

Alternative Contact: Community Link Program

Community Link Program
The Community Link Program is designed to support individuals as they maximize their independence in the community. Services provided are based on the interests and desires of the individual. The staff’s main goal is to assist in “linking” individuals with their community.

The program offers an innovative approach to supporting individuals in the use of community resources of their choice as they learn to maximize their independence. The program includes: group activities, one-to-one supports, social/habilitative services, work crew training, volunteer placement training, vacation/respite trips and in-home respite services. Supports are offered to small and large groups, as well as on a one-to-one basis.
Facility: Turtle Creek Valley MH/MR, Inc.

Program: Mental Retardation Services – Psychiatric Supports

Type of Program: Miscellaneous Services

Address: St. Robert Bellarmine School
1301 5th Avenue, First Floor
East McKeesport, PA 15035

Phone Number: 412-823-0600
Fax Number: 412-823-6665

Contact Person: Mary Jo Napotilano - QI Specialist

Alternative Contact: Psychiatric Supports

Psychiatric Supports
Individuals with mental retardation who also have psychiatric diagnoses face unique challenges. Outpatient services are geared to an individual’s cognitive level and include: therapy, psychiatric evaluation and medication review.

A therapist provides the individualized treatment. Focused in such areas as: symptom management, medication monitoring or relaxation techniques. The therapist acts as a liaison with the psychiatrist who specializes in serving individuals with a dual diagnosis. The therapist also participates in the interdisciplinary meetings.
Facility: Turtle Creek Valley MH/MR, Inc.

Program: Mental Retardation Services – Senior Program

Type of Program: Miscellaneous Services

Address: St. Robert Bellarmine School
1301 5th Avenue, First Floor
East McKeesport, PA 15035

Phone Number: 412-823-0600
Fax Number: 412-823-6665

Contact Person: Dave Chara – Day/Voc Coordinator

Senior Program
In response to the changing needs of older adults with mental retardation, this program provides integrated supports for individuals who choose to participate in less activities. Individuals have the opportunity to participate in a variety of daily activities such as: bingo, card parties, arts & crafts, and holiday parties. There are also outings to various places in the surrounding Pittsburgh area such as: picnics, community events and mall trips. For adventurous seniors, there are occasional overnight trips offered.

This program also provides seniors with educational information and guest speakers who address topics such as: nutrition, exercise, community awareness and insurance. A nurse evaluates all senior’s health concerns at least four times a year.

**Prevention:**
A variety of school-and community-based education programs are offered to encourage drug and alcohol prevention through education and intervention for schools, families and agencies. Some specific programs are: Drug and Alcohol Consultation, Teacher In-service Programs, Life Skills Groups, Anger Management and Tobacco Education.
Facility: Turtle Creek Valley MH/MR, Inc.

Program: Children and Family Services – Student Assistance Program

Type of Program: Miscellaneous Services

Address: Steel Valley COG
107 Maple Avenue
Homestead, PA 15120

Phone Number: 412-464-1522 (Prevention/Intervention)
Fax Number: 412-461-1325

Contact Person: Steve Zmigrosky-Asst. – SAP Supervisor

Student Assistance Program
Student Assistance Program consultation is offered in 10 school districts in Allegheny County. This service is designed to help school personnel identify issues that pose a barrier to a student’s success in school. These issues include, but are not limited to, academics, alcohol, drugs, mental health issues and behavioral concerns. The primary goal of the Student Assistance Program is to help students overcome these barriers in order to be successful in school. TCV consultants visit school weekly and participate in core team meetings, pre-assessment screenings, offering referrals, providing follow-up services for students and providing an education/support group.

**Underage Drinking Program**

This program is specifically designed for adolescents who have been convicted of drug and/or alcohol violations. The program is offered in conjunction with local district justices as a possible alternative to a fine and court costs. This program promotes the well-being of high-risk youth by educating young offenders about the risk and consequences of alcohol and other drug use and by helping to strengthen their decision-making, communication and coping skills. Upon completion of the Underage Drinking Program, a letter is sent to the referring district justice to confirm that all requirements were successfully fulfilled.

Teen Institute
Teen Institute is a two and a half day, 2 part program for high school students, which emphasizes personal growth and leadership development. School personnel select participating students based on their responsible character and willingness to learn. The first phase of the program is a day and a half (including an overnight), during which students get to interact and learn through a variety of activities, including workshops, skits, personal activities, a banquet and a dance. The second phase occurs about six months later when the participants gather again for one day to learn about teamwork, creativity and taking risks to succeed by participating in the Challenge by Choice obstacle course. Together, these two experiences help the participants grow to understand themselves and others in deeper ways.

**Tobacco Prevention and Cessation Classes**

TCV tobacco programs focus on the reduction of tobacco use and exposure to tobacco and smoke pollution, within our project area. Programming is funded by the PA Department of Health through Tobacco Free Allegheny and the Drug & Alcohol Prevention Unit of Allegheny County. Project activities include: Training teens to be peer educators and advocates for tobacco prevention; educating parents to talk to their kids about the harmful effects of tobacco; utilization of model programs (such as LifeSkills Training Prevention Curriculum) in area elementary and middle schools; providing tobacco education and cessation programs for teens and parents who smoke.

The Intensive Outpatient program is a multi-disciplinary, time-limited, intensive, goal-focused psychiatric treatment program. It is designed to provide further crisis stabilization and acute psychiatric symptom reduction as a step down from full day Acute Partial or Inpatient care. There is a staff ratio of at least one FTE staff to clients. The program accepts most commercial and managed care insurance.
Psychiatric Services – (See Point of Entry on Page 1)
724-226-4552

The psychiatric evaluations are designed to provide an assessment of present psychiatric symptomatology, level of impairment and associated risk factors to determine the appropriate treatment option including a trial of psychotropic medication, the appropriate educational setting, such as an approved private school or alternative therapy such as family-based services or Behavioral Health Rehabilitation Services (wraparound)

Counseling – (See Point of Entry on Page 1)

**724-226-4552**

Brief counseling will be provided to help consumers regain their pre-crisis level of functioning. Brief counseling is also available to those who have a circumscribed problem and are looking for rapid improvement towards goals. These consumers readily access their own strengths with assistance from the therapist. Typical treatment goals include developing coping skills and being connected to resources needed to maintain a higher level of functioning.

To provide outpatient psychotherapy and substance use/abuse education to any individual, family member or significant other experiencing an alcohol or drug problem as an early intervention, preventing drug or alcohol dependence late in life
Family Based Mental Health Services – Allegheny County – Kathy Werries
724-230-2721
Family Based Mental Health Services are designed to prevent psychiatric hospitalization and other out-of-the-home placements of a child and/or adolescent (up to 21 years of age) with emotional and behavioral problems. The goal of Family Based Services is to keep families together within their homes and communities and with the family being the primary caregiver. The focus of the treatment is to empower families to use their strengths and skills and to use their natural support systems to make positive, long-lasting changes, which will improve the quality of their lives.
Family Services of Western Pennsylvania provides mobile crisis service to adults and their families within Allegheny County. FSWP provides this service two weeks a month, in the evening and weekends. FSWP is part of a collaborative with ACES (Allegheny Crisis Emergency Services), which provides licensed telephone and mobile behavioral health crisis intervention services for all residents of Allegheny County. Mobile crisis provides assessment/resolution of a crisis situation in a home or community setting. These services include the following; crisis de-escalation, critical incident debriefing, referral to appropriate community service provider, consultation with an on-call psychiatrist, referral to acute care psychiatric facility, assistance with psychiatric commitment process, and coordination with current treatment teams if appropriate. Stabilization and the safety as well as the well being of those in crisis are of paramount importance to the team. Also safety of the team members is important.
Mobile MISA Support – Allegheny County
1-888-222-4200
A comprehensive program of support and treatment services delivered by therapeutic and peer support staff that focuses on consumers’ strengths and difficulties leading to recovery from mental health issues and substance abuse. The Mobile MISA program serves: Adults (24) years of age or older who reside in Westmoreland County. Consumers with a dual diagnosis of Mental Health issues (2) /Drug and Alcohol abuse or any consumer having a Mental Health diagnosis with a potential for Drug and Alcohol abuse or dependence. Persons who have a history of persistent mental illness and substance abuse.

**Family Support Counseling**  
**412-661-1670**  
Family Services of Western PA staff provide individual or family counseling, psycho-educational, and life skills services in family support centers throughout Allegheny County. This is done through collaboration with the family support center sponsoring agencies. The goal is to improve coping skills, educate parents about parenting skills and otherwise support family life for individuals, families and groups served by the family support centers.

Drug & Alcohol Counseling

To provide outpatient psychotherapy and substance use/abuse education to any individual, family member or significant other experiencing an alcohol or drug problem as an early intervention, preventing drug or alcohol dependence late.

Cove Forge BHS Pittsburgh is part of the Cove Forge/White Deer Run system and a division of CRC Health Corporation. The Pittsburgh outpatient office is located on the first floor of the Birmingham Towers on the Southside of Pittsburgh. We offer drug and alcohol evaluation/assessment, outpatient, intensive outpatient and partial hospitalization day treatment services. We also offer a drug and alcohol education class, which is held one time per month, or as needed. Admission to the IOP, OP and PHP programs are based on the Pennsylvania Client Placement Criteria (PCPC 2nd Edition) for adults and ASAM criteria for adolescents. Admission for services can be a result of referral from step-down from a higher level of care, or direct admission with or without a prior treatment history. The patient must meet criteria for Level 1A, 1B or 2A to qualify for admission to one of the programs offered at Cove Forge BHS Pittsburgh. Admissions are accepted without regard for age, gender, race, sexual orientation, religious preference, or disability(ies). We will accept clients with dual disorders provided they are stable on the appropriate medication(s) if applicable. Excluded are clients who have serious psychiatric disorders that require a higher level of mental health services, as we are primarily a drug and alcohol treatment facility.

Clients evaluated at needing a higher level of care such as halfway house, detoxification or rehabilitation (Levels 2B, 3A or 3B) are generally referred to one of our 6 inpatient facilities or 2 halfway houses. Transportation is provided from our Southside location to all of our facilities.

Cove Forge's outpatient sites utilize group and/or individual counseling, depending on the client's needs. Adult outpatient services are typically one session weekly, but can be up to two sessions weekly if needed. Individual sessions are one (1) hour in duration. Group is
typically 120 - 180 minutes. Day and evening groups are available. Adolescent outpatient services generally consist of two, two hour groups per week and can include individual counseling, as needed. The adolescent program meets in the evenings from 6-8pm.

Cove Forge’s IOP sites utilize a combination of group and individual counseling. Adult IOP services involve two group sessions and one individual session or three group sessions weekly. Each group session is three (3) hours in duration. The individual session is one (1) hour in duration. The IOP offers six to ten (6-10) hours of service weekly. Day and evening groups are available. Day groups are held Monday, Wednesday and Friday from 9am-12pm and evening groups are held Tuesday, Wednesday and Thursday evenings from 6pm-9pm.

Family group is held the first Weds. evening of the month.

The Partial Hospitalization program meets 5 days per week for a total of 24 hours per week. Partial clients attend group Monday, Wednesday and Fridays from 9am-3:30pm and Tuesdays and Thursdays from 9am-12pm. Clients in the partial program also receive 2 individual sessions per week.

Treatment is based upon a holistic approach, which addresses all needs of the client including: physical, emotional, intellectual and spiritual needs. Counseling modalities for all of the programs are based on a variety of therapeutic approaches. The counseling staff generally use Brief Solution-Focused Therapy, Reality Therapy and Rational Emotive Therapy (R.E.T.). Ancillary services include random or "with cause" urinalysis and psychiatric evaluations and medication checks for clients actively involved in treatment at Cove Forge.
Discovery House is a Methadone Maintenance Program to help those with a Heroin Addiction into Recovery. Addiction is cunning, baffling and powerful; it respects no one at all. Anyone may become opiate addicted at any stage of life.

We believe in harm reduction, progress rather than perfection, and the inherent dignity of every human being. We offer treatment to the whole person; address every diagnosis, either on site or through appropriate referrals.

Discovery House employees professionals in all Disciplines; Counseling, Assessment, Nursing, Medical, and Management Personnel to help you better achieve your goals and needs on your way back into life.

The more wrap around services we can offer you, the better chance you have at success. The more you are willing to accept as help/assistance, the sooner you feel human and productive again.

Methadone Maintenance has the highest success rate of all the modalities of treatment in the Drug and Alcohol field. So, if other attempts to go clean have failed, perhaps this is your chance to win…win yourself back!

Step 1 – Join the Team
Welcome to FamilyLinks’ Wraparound Program. The goal of Step 1 is to establish concrete outcomes, which allow for efficient and effective short-term treatment. You will be invited to join a treatment team that will be designing services specifically tailored to the needs of the client and family. Team members may include the prescribing physician and/or psychologist, a case manager, school personnel if indicated, the other significant adults/caretakers identified by the team. Parents are always central and included in the treatment team.
We will begin services arranging a psychiatric and/or psychological evaluation for the identified child and a complete home interview. The team will then meet as a group to review the findings and recommendations of the evaluation and interview. At this time, the team will design the treatment plan. “Concrete goals with and end in sight”

Step 2 – Treatment
Step 2 involves the monitoring, assessing and fine-tuning of treatment. This process occurs through “milestone checks” and tracking what is working. Treatment usually begins with daily interventions, which become less frequent as needed. Services are designed to “Phase Out” as skills are developed to maintain the desired treatment outcomes.
Treatment will take place in the home, school, and/or community as defined by the team. An assigned Mobile Therapist (MT) and Therapeutic support Staff (TSS) will be responsible for providing treatment under supervision of the Behavioral Specialist Consultant (BSC) who may elect to meet with you and make recommendations. The MT usually works directly with parents and professionals. The TSS will work directly with the child on a one-to-one basis.

Step 3 – Success
Step 3 plans for a successful graduation and a “firing” of the treatment team. As treatment comes to an end, we celebrate in recognition of the child and family’s mastery of tools and techniques, which allow them to proceed without the need of the team. As the goals are attained and maintained, the team is available for consultation and to assist in the termination of treatment.
Congratulations!
Wraparound Professionals:

**Psychiatrist** - may complete the evaluation(s). Will prescribe medication and complete medication follow-up if indicated.

**Psychologist** - may complete the evaluation(s). May also serve in the role of Behavior Consultant and/or Mobile Therapist.

**Behavior Specialist consultation (BSC)**, is responsible for managing the case. Will maintain communication with all participants to ensure the treatment plan is maintained.

**Mobile Therapist (MT)** – is responsible for working with the parents/family to assist in developing techniques and procedures that allow for the family to function independently.

**Therapeutic Support Staff (TSS)** - is responsible for working directly with the child on a one-to-one therapeutic basis.

The treatment plan is designed by both the parents and the mental health providers to include goals and a behavior plan.

**Plan of Care Summary (PCS)** – A document listing the specific hours of treatment, which will provide the services, and the professional credentials required for the providers.

**Continuation of Care Meeting** – Takes place 30-45 days prior to the end of the allotted treatment time. The purpose is to determine if additional treatment is needed.
Based in Home and Community
Family Based Mental Health Services provides interventions, support services and therapy in the home and community for families and their children or adolescents, who have significant emotional disturbances.

The guiding principle of family-based services is that children grow up best in their own homes. Therefore, intensive individual and family therapy, as well as interventions in the child’s life, are provided in the home and community, by a team of two mental health clinicians.

Treatment is responsive to the clients’ lives and tailored to each family’s unique situation, including cultural forces.

Goal Oriented
A team of two mental health clinicians and the family set goals by identifying the child and family’s strengths and assessing the areas of need. They create a treatment plan, which includes specific behavioral strategies and individualized goals. This plan reflects the child or adolescent’s developmental needs and will include family, emotional, intellectual, physical, social, and cultural factors. The team periodically review progress and establishes new goals as needed. With the family’s consent, other agencies providing services to the child may participate in the review process.

Convenient and Flexible
Family-Based services are convenient, since they occur at home or in the community. They are flexible with delivery of services occurring at times most convenient to the family, with emphasis on evenings and weekends. Brief crisis intervention and stabilization is available 24 hours a day, 7 days a week. The mental health team works with other service providers who are involved with the family to ensure that treatment is consistent and convenient.
Supportive
The mental health team provides support for parents in implementing effective behavior management in the home, school, and community. Parent training is specific to the child or adolescent and family needs.
Other Skills Developed may include:
- Coping skills
- Problem solving
- Life Skills and
- Stress Management
School-based consultation and intervention are also provided if indicated. Parents are assisted in accessing other support services in the community as needed.

Short-Term
The maximum length of service is 8 months. Individual treatment may vary depending on a family's progress.
Prior to completion of services the mental health team and the family develop an AFTERCARE plan to ensure that the family's needs continue to be met.

To Receive Family-Based Mental Health Services
The child or adolescent needs a recommendation by a physician or licensed psychologist and must be diagnosed with a mental health problem or emotional disturbance. He or she must also be determined to be at risk for out-of-home placement. At least one adult family member must agree to participate in treatment.
Crisis Intervention
To maximize the potential of Allegheny County Residents

We offer an integrated system of urgent and routine crisis response for youth and families at-risk or in crisis situations, with immediate response available 24 hours a day.

We respond by sending a team of crisis intervention specialists to the crisis location, whether at home, in school, at community centers, or other public location. After stabilizing the situation, we begin an evaluation and assessment process. We are then able to recommend a course of action, including providing referrals to additional services, if needed.

Who We Are
We are a team of crisis intervention specialists. We provide assistance to any individual or family in a crisis situation.

Who is Eligible?
All residents of Allegheny County are eligible to receive crisis intervention services.

Where We Provide Services
We serve our clients in their homes, in school's, at community Centers or in any public institution in which the crisis may be occurring.

What You Can Expect From Our Services
We will first work to extinguish the crisis and stabilize the situation. Then, following an evaluation and assessment process, we will make recommendations about how to proceed and provide referrals to additional services, as needed.

Our Goals
Mobile Crisis Intervention works to achieve the mission of FamilyLinks, to be a caring link joining the resources of individuals, families, and communities to build hope, health, and strength.
We are dedicated to helping youth and families who find themselves in crisis. We do this by providing alternatives and joining individuals and families with additional resources in the community that may help them succeed.

We aspire to offer our clients hope, health, and Strength, so that they can better cope with the issues they face.
Outpatient Treatment is a non-residential treatment service providing therapy to clients who reside in the community. A range of services is available depending upon individual needs, not to exceed (5) hours of treatment per week.

House of the Crossroads Outpatient & Intensive Outpatient Treatment Center is managed within a Therapeutic Community framework, which provides management of the participants’ addiction and promotes their acceptance of personal responsibility. This framework is based on ideas of collective responsibility, citizenship and empowerment. Therapeutic communities are deliberately structured in a way that aims to encourage responsibility and avoid unhelpful dependency on professionals. Participants are seen as bringing strengths and creative energy into the therapeutic setting, and the peer group is seen as all-important in establishing a strong therapeutic alliance. The therapeutic community model is collaborative, and therefore depends on participant motivation. The work with each participant is designed to be at multiple levels of psychological functioning: individual & group therapy, relapse prevention, individual personality structure, social relationships, basic skills of living and working, and family relationships. Participants work in a range of groups, some exploratory/analytic, some cognitive/behavioral and psychoeducational/problem focused.

The Center supports the participant with on and off site services (taking the services to the participant) in the maintenance of existing relationships within their home area, which are likely to be important in the period following treatment. Informal mutual support networks outside operational times is utilized and outreach, follow-up and support services (e.g. mental health and medication consultation, transportation, housing, vocational, educational, employment, etc.) are provided. Housing provision can also be maintained and provides an opportunity to practice newfound social skills and confidence in a non-protected environment.

The House of the Crossroads Outpatient and Intensive Outpatient Treatment Center is licensed by the Pennsylvania Department of Health Bureau of Drug and Alcohol Programs.
Mercy Behavioral Health offers Anger Management group therapy at the four locations listed above. This group is designed for mental health and alcohol and other drug consumers who are experiencing or have experienced negative consequences as a result of their unmanageable verbal or physical demonstration of anger toward others. For some, this behavior may have resulted in legal consequences. The program meets once per week for eight weeks at all of the locations listed above. Evening hours are available for the convenience of those who have employment responsibilities during the day. The treatment modality is group therapy and each session is one and one-half hour in length. Anger Management group is offered throughout the year at the various locations in an attempt to accommodate consumers on an as needed basis. Parking is free for consumers at most locations and services are easily accessed via the Port Authority Bus Transportation system.

Issues addressed and group format include the following:

- Healthy Expression of Anger
- Taking Personal Responsibility for Expression of Anger
- Identification of Triggers and Body Cues that lead to Angry Outbursts
- Developing the ability to communicate assertively rather than angrily
- Cognitive Restructuring
- Utilizing Time Out to effectively manage feelings and expressions of anger
- Conflict Resolution and Domestic Violence
- The Group checks in each week to report pertinent issues followed by guided discussion related to the topics listed above.

The goal of the group is to provide members with a safe and therapeutic place to discuss issues related to poor anger management. Group members are provided with handouts and discussion about various coping skills and are encouraged to practice between groups. The goal of the program is to attempt reducing the revolving door syndrome in which some offenders find themselves repeatedly facing criminal consequences for behaviors that are difficult to change. Overall, reduced recidivism is the desired outcome.

**EVENING HOURS AVAILABLE AT ALL LOCATIONS**
FEES AND INSURANCE:

Mercy Behavioral Health fees for service are standard within the behavioral healthcare industry. All services are provided without discrimination. The Commonwealth of Pennsylvania has financial liability guidelines that determine an individual’s ability to pay for services. Factors that help reduce out-of-pocket expenses include adequate health insurance coverage and confirmation of financial information. Please advise referrals for services to be prepared to produce evidence of health coverage at the first appointment.

PLEASE NOTE THAT ALL CALLS FOR SERVICE SHOULD BE DIRECTED TO THE TELEPHONE NUMBER GIVEN ABOVE AND EVERY EFFORT WILL BE MADE TO ACCOMMODATE INDIVIDUALS IN THE MOST SATISFACTORY AND CONVENIENT MANNER IN CONSIDERATION OF WHERE THEY LIVE AND WHAT THEIR DAILY WORK SCHEDULE MAY BE.

PROGRAM DESCRIPTION

The Mercy Behavioral Health Forensic Outpatient Unit offers a Criminality Group: Positive Thinking for a Change four times per year. The group is an intervention strategy designed for chemically dependent, substance abusing, criminal offenders who demonstrate their ability to manage, for the most part, their chemical addictions but continue to engage in criminal behavior, thus finding themselves consistently involved in the criminal justice system. The group meets for a total of fifteen sessions which include an initial assessment utilizing the LSI-R, twelve group sessions co-facilitated by an addictions and criminality therapist, one individual session post LSI-R and one wrap-up session to review progress realized as a result of participation. The group is open ended and new admissions are taken at the beginning of each module of the program.

Program Approach:
- Cognitive/Behavioral
- Experiential, Role Playing and Homework Assignments
- Group support/redirection/confrontation

Areas addressed include:
- Interpersonal, Work and Vocational Functioning
- How Criminal Actions Affect the Victim (Taking Responsibility)
- Anger Management and Impulse Control
- Impact on Families: Family, Significant Others invited to the session
- Addictive cycle and criminality cycle and their interrelatedness: triggers and how both sets of behavior are reinforcing (co-facilitated by psychiatrist)
- Brain Chemistry and its contribution to the problem (facilitated by psychiatrist)
- Thinking about Behavior
- Self Assessment, Warning Sign Identification, Warning Sign Management
- Recovery Planning

PROGRAM DESCRIPTION

Mercy Behavioral Health, South 9th Street and East Commons locations offer a dual recovery intensive outpatient program to address the basic issues of addiction, recovery and relapse prevention. The program is designed for those individuals facing the many challenges of mental illness and substance abuse. The program utilizes primarily a group therapy approach as well as individual therapy as needed. Childcare is available for some programs. Additional services include psychiatric evaluation, medication monitoring and case management referral as needed.

The program meets three days per week, Monday, Wednesday and Friday for three hours each morning at the South 9th Street location and three times per week for three hours during the evening at the East Commons location. Parking is free for all consumers and services are easily accessed via the Port Authority Bus Transportation system.

Our staff takes pride in its multi-faceted approach to the challenges an individual faces regarding mental illness, substance abuse/addiction and involvement in the criminal justice system. The philosophy of treatment stresses a wellness model of recovery. Some of the areas and issues we address include:

- Basic issues of addiction, recovery and relapse prevention
- Relapse Prevention for those individuals who have experienced relapse in their recovery.
- Basic issues of medication compliance as they relate to managing mental illness
- Medication Education
- Grief and loss issues
- Spirituality issues
- Issues of sobriety and the reduction of symptoms of mental illness via provision of support and education
- Development of specific skills and strategies to prevent relapse

**Intensive Outpatient Program**

This program offers structured, intensive treatment services - including group therapy with attention to gender specific issues; individual and family therapy; psychiatric evaluation and medication monitoring as needed; psycho-education on addiction and recovery; and case management - for individuals over age 18 who are dependent on alcohol and/or other drugs. The IOP Program is designed for individuals struggling with early recovery who require more support than outpatient treatment alone can provide.

Consumers gain knowledge and skills essential to maintain sobriety, prevent relapse and attain a higher level of functioning. The consumer also receives the benefits of both group and individual treatment, along with education on recovery from substance abuse and case management services. The Intensive Outpatient Program meets 3 days per week for 3 hours per day.

Alternatives Outpatient Drug & Alcohol Programs
These individual, group and family services are provided to those over the age of 18 and who desire assistance in overcoming problems with abuse of/or dependence on alcohol and/or other drugs. Psychiatric evaluation with medication management services are offered when needed. Consumers who have successfully completed the Intensive Outpatient Program can pursue long-term recovery and growth with the support of Relapse Prevention Groups. Men in early recovery with legal or other issues can take advantage of the Men's Early Recovery Group. The Dual Diagnosis Group and several Relapse Prevention Groups have been added for individuals who have been involved with the criminal justice system and rely on belief systems based on criminal lifestyles.

Website: www.power-recovery.com

POWER Outpatient Program

Located at Fifth Avenue Commons in the Uptown section of Pittsburgh, the POWER Outpatient Program offers women who do not need residential services an opportunity to receive gender-specialized treatment and support, but in an outpatient setting. We offer two levels of care at this site. Regular outpatient treatment usually consists of individual therapy and can be offered for 1 to 5 hours a week, depending on the need. Services that are more intensive, referred to as an IOP (Intensive Outpatient Program), offer up to 9 hours of treatment, primarily in a group setting focusing on women’s issues.

Treatment and support services at our Halfway House include:

- Screening & Assessment
- Individual, Group & Family Therapy
- Alcohol & Other Drug Education
- Life Skills Development
- Parenting Education & Support for Family Reunification
- Support for 12-Step Involvement
- HIV/AIDS Counseling & Testing
- Relapse Prevention Classes
- Discharge Planning & Follow-Up

Women 18 and older who are struggling with substance abuse and dependency are eligible for POWER’s treatment programs. POWER accepts women with co-occurring disorders and women who are pregnant. In fact, priority is given to women who are pregnant, parenting or IV drug users. We also accept women from the Drug Court Program.
POWER Connection

POWER Connection is an intervention and recovery support program. Through a partnership with the Office of Children, Youth and Families (CYF), the program connects women and their families to substance abuse treatment and support services. Staff assists women who are willing to look at how their use of alcohol and other drugs is affecting them and their children. POWER Connection strives to help women become free from chemical dependency, establish natural support systems to maintain a clean and sober lifestyle, and preserve the integrity of their families.

Services include:

- In-home Screening & Assessment
- Referral to Treatment & Help in Arranging Admission
- Mentoring to Model & Encourage Healthy Recovery
- Collaboration with Other Service Providers
- Resource Coordination & Linkage to Community Supports
- Discharge Planning & Follow-up
- Consultation

POWER Connection offers the full range of services to mothers, pregnant women or women caring for children, who acknowledge or are suspected of struggling with substance abuse or dependency. Assessment and referral services are also available to men and teenagers in a client’s family when their use of alcohol and other drugs puts her recovery at risk. Referrals to POWER Connection must come from CYF.

Program Description:
The mission of Renewal, Inc. states, “Dedicated to the renewal of individuals in the criminal justice system and to their return to society as responsible citizens.” Renewal, Inc. believes in the positive integration and rebuilding of offenders’ lives by offering education, job readiness, counseling, community service, opportunities for drug & alcohol therapy, as well as social readjustment by redefining life goals and values and cognitive restructuring. The program promotes work release opportunities, assists in recovery, increases accountability and reduces recidivism with the assurance of promoting public safety. The program is also cost effective for the taxpayer and a safety valve for the criminal justice system. Residents live in a controlled environment, which offers stability and encourages confidence in self. Skilled monitors and case managers supervise residents 24 hours a day. Residents attend Alcoholics/Narcotics Anonymous meetings and receive individual and group counseling.

Renewal, Inc. has incorporated a cognitive/behavioral approach in addressing the criminal mindset of our residents. The program, which is currently based on the “What Works” curriculum, is an approach that has been proven by research to effectively address the needs of the offender and provide the maximum benefit. The criminogenic needs unique to an offender are identified at the very beginning by administering a standardized instrument. Presently, Renewal, Inc. uses an instrument called the Level of Service Inventory - Revised (LSI-R).

The Cognitive program assists residents in identifying faulty worldviews that lead to criminal thinking and behavior. The Thinking for a Change program is a multi-level program consisting of three progressive phases. Life skills and basic education classes are offered. Job placement specialists and an extensive network of employers are available to clients. In addition to supportive services, part of Renewal, Inc.’s success lies in its residents committing to community service work. Residents help numerous non-profit agencies, churches, local government, civic organizations, etc., annually. Renewal, Inc. residents provide thousands of hours of volunteer community service every year to the Pittsburgh area. Renewal, Inc.’s programs enable residents to be productive citizens and reduce the number of repeat offenses. The Renewal, Inc. program also relieves the overcrowding of traditional prisons while ensuring public safety.
The safety and security of the community to which residents are released is of utmost importance. Residents are prohibited from consumption of alcohol and illicit drugs. Residents and visitors are subject to search upon entering the premises. Staff and residents are prohibited from carrying any type of weapons. All residents are tested for alcohol consumption upon each entry and are subject to randomly scheduled urinalysis to assure a program free of illicit alcohol and drug use. Staff make frequent phone and on-site verifications of scheduled activities to ensure resident accountability. The facilities are supervised twenty-four hours a day with adequate staffing on all shifts. Residents are required to follow an approved weekly schedule of activities, and residents eligible for work release and outside activities must sign in and out of the facility under staff supervision.

Renewal Treatment Inc. (RTI) is a private, non-profit treatment entity of Renewal, Inc. RTI was formed to provide a continuum of specialized addictions treatment services for individuals in the criminal justice system. Both inpatient and outpatient services are offered. Individualized substance abuse counseling services are provided to residents. In treating the criminal addict, cognitive distortions must be addressed in order for a successful treatment outcome. Therefore, RTI believes we must address the addiction and criminality simultaneously using a cognitive behavioral model.

Individuals who are referred to RTI undergo a thorough evaluation. Assessments such as the Substance Abuse Subtle Screening Inventory (SASSI) and Level of Service Inventory-Revised (LSI-R) are administered. The appropriate care is determined by the client’s needs, the history of treatment, and the PA Client Placement Criteria (PCPC). Treatment includes proven clinical interventions that address client specific problems. All participants in the program receive a comprehensive aftercare plan.

Renewal Treatment Inc., Renewal, Inc.’s sister company, was first licensed to provide drug and alcohol treatment services in September 2002. RTI has maintained the licensure with the Pennsylvania Department of Health, Bureau of Drug & Alcohol Licensing, in good standing, since the inception of services.

In December of 2005, Renewal Treatment Inc.’s inpatient Drug and Alcohol program was dedicated as the William J. Schofield III Renewal Treatment Center, in recognition and memory of one of Renewal’s founding leaders. His life was dedicated to service to the community in many aspects, and he had a particular interest in the rehabilitation of the addicted offender, and for continuing research in the addictions field.

Mental Health Outpatient Services
Outpatient therapy provides recovery-focused behavioral health services to persons with mental illness to gain an improved quality of life for individuals over 18 years and older. Outpatient services help individuals achieve, and then maintain a decrease in distressing symptoms with an increase in coping and life-management skills. Expected outcomes include enhanced ability to function and improved quality of life.

Services include initial clinical assessment, psychiatric evaluation, medication management, and individual, group and family psychotherapy. Outpatient therapists and case managers work closely with community resources to coordinate care and a variety of agency programs, such as Resource Coordination, Intensive Case Management, Psychosocial Rehabilitation and with community resources to coordinate care.
Facility: Turtle Creek Valley MH/MR, Inc.

Children and Family Services

Treatment:
Family Services Outpatient Treatment provides brief, family-focused mental health treatment for children, adolescents and their families. Treatment includes assessment, treatment planning, and family, individual, couples and group therapies. Services also include psychiatric evaluations, medication monitoring and psycho-educational testing. These services can be office-based, school-based or intensive community-based Wrap Around Services.

**School-Based Outpatient Treatment**

Treatment services can be provided on site at participating schools during school hours. The benefits of this approach are improved access to treatment for the student and family and increased efficiency in resolving problems that a student may be experiencing at school. In several participating schools, these services are part of a continuum as described in our Prevention/Intervention Services section “School Teams.”

**Summer Therapeutic Activities Camp (S.T.A.P.)**
An innovative summer day camp that provides children with behavioral health issues opportunities to engage in activities with their peers and develop a sense of competence and self-confidence. The camp is staffed with highly qualified mental health professionals who provide a structured and supportive group environment. Candidates for camp must meet the Wrap Around eligibility requirements.
Treating the disease of chemical dependency requires physical, mental and spiritual rehabilitation. Through group and individual counseling, patients develop understanding and self-awareness making recovery possible.

The program goals are to:

- Achieve and maintain abstinence
- Increase patient and family understanding of chemical dependency
- Gain acceptance of this disease
- Learn tools of recovery and stages of relapse
- Encourage the use of personal support groups such as NA, AA, CODA, ACOA and Alanon.

Adult Services are as follows:

- Day and Evening Outpatient Services
- Day and Evening Intensive Outpatient Services
- Aftercare services
- Access to an in-office psychiatrist for any mental health needs
- Transportation assistance provided for those on Medical Assistance and Health Choices
ACJ Women’s Intervention Groups and Women’s Release Project. Three full time Zoar employees coordinate activities in, and between, these two projects. Women in jail may sign up to participate in the Intervention Groups. These meet three days a week and focus on women and substance abuse. Women in these groups may also request assistance with pre-release planning. This could include acceptance into community addiction treatment, facilitated by Zoar, as a condition of release. Women in the Intervention Groups, and other women anticipating release, might also participate in the Women’s Release Project. In this project, Zoar counselors assist the women with pre-release planning and then actively support the women after release. The focus is on pre-arranged immediate acceptance into addiction and/or mental health treatment, plus help in obtaining health care and medications, assisting women with meeting basic needs for clothing, food, and shelter, and working with CYF, probation/parole, and other programs to help a woman reconnect with community supports and services.

Mercy Behavioral Health offers mental health, alcohol and other drug and forensic outpatient services geared toward each individual’s need. Our goal is to reduce symptoms, increase independent functioning and contribute to living in a safe community environment. The specialized forensic outpatient program is designed to work closely with the criminal justice system, county probation and state parole officers. The program provides services to consumers who are mentally ill, addicted to alcohol or other drugs, sexual offenders or repeatedly involved in the criminal justice system behaviors.

We can help with bipolar disorder, depression, schizophrenia, personality disorders, anxiety, mental illness/drug and alcohol addiction (dual diagnosis), anger management, criminality and sexual offending problems and behaviors. A Mercy Behavioral Health psychiatrist oversees every treatment plan and prescribes medication where appropriate.

We recognize that one approach to treating alcohol and other drug addictions doesn’t necessarily work for everyone. And while total abstinence is the ultimate goal, our staff understands how difficult this is to achieve at the start. We are willing and ready to work with you to work with each individual in establishing personal goals and creating a lifestyle that moves one toward recovery and law abiding behavior.

**MENTAL HEALTH PROGRAMS:**

* Crisis Intervention  
* Medication Services  
* Individual and Group Therapy  
* Dual Recovery  
* Intensive Outpatient: meets daily  
* Sex Offender Specific Individual and Group Therapy  
* Anger Management Group Therapy  
* Criminal Thinking for a Change Group Therapy  
* HIV/AIDS Education and On-Site Testing

**ALCOHOL AND OTHER DRUGS PROGRAMS:**

* Crisis Intervention  
* Addiction Counseling  
* Individual and Group Counseling  
* Dual Recovery  
* Intensive Outpatient: meets daily  
* Twelve-step Support  
* Relapse Prevention  
* DUI Court Appointed Classes  
* HIV/AIDS and On-site Testing
CONVENIENT LOCATIONS:

Mercy Behavioral Health (South)       East Commons Center (North)
330 South 9th Street                  12 East Commons
Pittsburgh, PA  15203                  Pittsburgh, PA  15212

Renaissance Center                   The Gatehouse
910 Penn Avenue                      101 West Station Square Dr.
Pittsburgh, PA  15222                 Pittsburgh, PA  15219

EVENING HOURS AVAILABLE AT ALL LOCATIONS

FEES AND INSURANCE:

Mercy Behavioral Health fees for service are standard within the behavioral healthcare industry. All services are provided without discrimination. The Commonwealth of Pennsylvania has financial liability guidelines that determine an individual’s ability to pay for services. Factors that help reduce out-of-pocket expenses include adequate health insurance coverage and confirmation of financial information. Please advise referrals for services to be prepared to produce evidence of health coverage at the first appointment.

PLEASE NOTE THAT ALL CALLS FOR SERVICE SHOULD BE DIRECTED TO THE TELEPHONE NUMBER GIVEN ABOVE AND EVERY EFFORT WILL BE MADE TO ACCOMMODATE INDIVIDUALS IN THE MOST SATISFACTORY AND CONVENIENT MANNER IN CONSIDERATION OF WHERE THEY LIVE AND WHAT THEIR DAILY WORK SCHEDULE MAY BE.

**Program Description:**

The mission of Renewal, Inc. states, “Dedicated to the renewal of individuals in the criminal justice system and to their return to society as responsible citizens.” Renewal, Inc. believes in the positive integration and rebuilding of offenders’ lives by offering education, job readiness, counseling, community service, opportunities for drug & alcohol therapy, as well as social readjustment by redefining life goals and values and cognitive restructuring. The program promotes work release opportunities, assists in recovery, increases accountability and reduces recidivism with the assurance of promoting public safety. The program is also cost effective for the taxpayer and a safety valve for the criminal justice system. Residents live in a controlled environment, which offers stability and encourages confidence in self. Skilled monitors and case managers supervise residents 24 hours a day. Residents attend Alcoholics/Narcotics Anonymous meetings and receive individual and group counseling.

Renewal, Inc. has incorporated a cognitive/behavioral approach in addressing the criminal mindset of our residents. The program, which is currently based on the “What Works” curriculum, is an approach that has been proven by research to effectively address the needs of the offender and provide the maximum benefit. The criminogenic needs unique to an offender are identified at the very beginning by administering a standardized instrument. Presently, Renewal, Inc. uses an instrument called the Level of Service Inventory - Revised (LSI-R).

The Cognitive program assists residents in identifying faulty worldviews that lead to criminal thinking and behavior. The Thinking for a Change program is a multi-level program consisting of three progressive phases. Life skills and basic education classes are offered. Job placement specialists and an extensive network of employers are available to clients. In addition to supportive services, part of Renewal, Inc.’s success lies in its residents committing to community service work. Residents help numerous non-profit agencies, churches, local government, civic organizations, etc., annually. Renewal, Inc. residents provide thousands of hours of volunteer community service every year to the Pittsburgh area. Renewal, Inc.’s programs enable residents to be productive citizens and reduce the number of repeat offenses. The Renewal, Inc. program also relieves the overcrowding of traditional prisons while ensuring public safety.
The safety and security of the community to which residents are released is of utmost importance. Residents are prohibited from consumption of alcohol and illicit drugs. Residents and visitors are subject to search upon entering the premises. Staff and residents are prohibited from carrying any type of weapons. All residents are tested for alcohol consumption upon each entry and are subject to randomly scheduled urinalysis to assure a program free of illicit alcohol and drug use. Staff make frequent phone and on-site verifications of scheduled activities to ensure resident accountability. The facilities are supervised twenty-four hours a day with adequate staffing on all shifts. Residents are required to follow an approved weekly schedule of activities, and residents eligible for work release and outside activities must sign in and out of the facility under staff supervision.

Renewal Treatment Inc. (RTI) is a private, non-profit treatment entity of Renewal, Inc. RTI was formed to provide a continuum of specialized addictions treatment services for individuals in the criminal justice system. Both inpatient and outpatient services are offered. Individualized substance abuse counseling services are provided to residents. In treating the criminal addict, cognitive distortions must be addressed in order for a successful treatment outcome. Therefore, RTI believes we must address the addiction and criminality simultaneously using a cognitive behavioral model.

Individuals who are referred to RTI undergo a thorough evaluation. Assessments such as the Substance Abuse Subtle Screening Inventory (SASSI) and Level of Service Inventory-Revised (LSI-R) are administered. The appropriate care is determined by the client’s needs, the history of treatment, and the PA Client Placement Criteria (PCPC). Treatment includes proven clinical interventions that address client specific problems. All participants in the program receive a comprehensive aftercare plan.

Renewal Treatment Inc., Renewal, Inc.’s sister company, was first licensed to provide drug and alcohol treatment services in September 2002. RTI has maintained the licensure with the Pennsylvania Department of Health, Bureau of Drug & Alcohol Licensing, in good standing, since the inception of services.

In December of 2005, Renewal Treatment Inc.’s inpatient Drug and Alcohol program was dedicated as the William J. Schofield III Renewal Treatment Center, in recognition and memory of one of Renewal’s founding leaders. His life was dedicated to service to the community in many aspects, and he had a particular interest in the rehabilitation of the addicted offender, and for continuing research in the addictions field.
